

LEADING EDGE CHANGE
Professional Programmes for Peak Performance

MATHS FOR BUSINESS

Finance Crash Course

A Leading Edge Change Development Programme

First moves into management are exciting times. Management training, as provided by Leading Edge Change, gives techniques and confidence for personal development but certain basic practical skills are equally essential.

Managers who come from “non-business” backgrounds are immediately exposed to areas of business reporting which may be completely new to them. One such area is that of financial reporting: management is about managing a company’s assets and finance and no management position is complete without a reasonable understanding of the basics.

Our one day Finance Crash Course is designed to equip you with an understanding of the data you will suddenly be exposed to and explain some of the jargon seen in financial reports. Business finance is a vast subject; as a manager, some knowledge of this is key to success.

With this training you will benefit from:

- ◆ Understand your budget
- ◆ Understanding the impact of your actions on your company
- ◆ Improved confidence that only knowledge can bring
- ◆ Keep up-to-speed and make valuable contributions in meetings and initiatives.

Key features:

- ◆ Budgets
- ◆ Revenue, Turnover, Income
- ◆ Understanding Management Accounts
- ◆ Materials costs, Direct costs, Overheads and indirect costs
- ◆ Gross profit
- ◆ Operating profit
- ◆ Balance sheet and cash flow
- ◆ Business case, Business Plan and ROI

These focussed development programmes allow us to work closely with your selected employees to deliver more skill enhancements faster.

LEADING EDGE CHANGE is committed to helping business achieve its potential in an ethical and sustainable way.

We all know that business outcomes are a direct result of the activities of the people working on them. To make a real difference people need three things:

1. Motivation
2. To think in ways that allow new distinctions to emerge
3. To be able to build the relationships needed to get the desired results

Combining all the proven benefits of NLP techniques with our extensive business and training experience, our performance training programmes will promote development in all three areas. Furthermore, as learning works best when all senses are engaged, our training challenges participants to engage fully. All workshops and programmes involve practical, interactive experience to make them fun and accelerate easy learning.

Our workshops, development programmes and training courses are available at a timing, length and price to suit your needs. We will run courses and programmes individually or as a package as required.

Other services:

Our **Personal Executive Coaching** provides confidential one-on-one coaching for directors and senior management, helping them find their own special talents to make the changes that take business forward.

Our **Strategic Coaching** helps a board or management team define their overall business goals and desired outcomes, development the strategy, build and test the business case and business plan and implementation planning and delivery.
